PROFESSIONAL EXPERIENCE

Viatrix Inc

March 2026 - Present

Senior Data Analyst, USA

- Translated business requirements into a **SharePoint site** and **Power Apps** application for 40+ users to capture and submit operational data, feeding a Power BI dashboard that powers the weekly operational review
- Built **Power Automate** workflows on SharePoint lists to de-duplicate multi-value fields, append the latest version controlled comments, and automated ad-hoc report summarization and emails, cutting repetitive **manual tasks by 24%**
- Designed **5+ Power BI dashboards** on semantic models in Microsoft Fabric (DAX, Power Query/M) for budget tracking, risk escalation, and PM status updates across 3 major tech-transfer projects
- Engineered a **Microsoft Copilot Studio agent** over SharePoint lists and Excel trackers, enabling PMs to query risks, updates, and milestones in natural language and surface top escalations, adopted by 5 senior directors.
- Working on building a PySpark based mini data warehouse on **Microsoft Fabric** with Azure Data Factory orchestration and Delta Lake medallion architecture, feeding Power BI semantic models and SQL queries

Data Analyst Intern, USA

July 2024 - Dec 2024

- Developed Simulation model to forecast timelines and manufacturing volumes from existing to new site as a part of \$1B+ tech-transfer project to minimize regulatory and inventory costs, **enabling leadership decisions** on risk tradeoffs
- Transformed a legacy Excel model into an automated Alteryx workflow integrated with Python simulation and Power BI, cutting manual update time **from 6+ hours to under 10 minutes**
- Created **4+ Excel simulation** tools using Power Query, PivotTables, lookups, and charts for 40+ planners across 10 sites
- Orchestrated real-time dashboards in Power BI to track KPIs like OTIF, Past Due Orders, Tech transfer volumes, cycle time, Unconfirmed orders, that ranked in the **top 3% of the dashboards at Viatrix** and enabled data-driven decisions

Teaching and Research Assistant

Sept 2025 - Dec 2025

Northeastern University, USA

- Guided 90+ students on Power BI dashboards, narrative visualization design, leveraging **GenAI tools (Copilot in Power BI, LLM drafted DAX, MCP)** to deliver rubric-aligned feedback grounded in **data-storytelling principles and BI design**

Habtec Tubes Industry

Oct 2020 - July 2023

Data Analyst, India

- Initiated end-to-end development of **8+ Power BI dashboards** tracking yield, WIP, and logistics KPIs, Material usage trend identifying operational bottlenecks and delivering actionable insights that improved logistics efficiency by **20%**
- Supported **Integrated Business Planning (IBP)** and sourcing initiatives by analyzing sales forecasts, production capacity, and supplier performance data, applying Lean Six Sigma methodologies to improve planning accuracy
- Supported procurement and production teams and pioneered a logistics optimization approach with **SQL**, processing 15M+ records to group similar orders and prioritize delivery dates, cutting analysis time by 25%
- Led a high-performing analytics team of 5 through Agile sprint cycles, coordinating deliverables, resolving blockers, and ensuring on-time delivery of enterprise BI assets across global time zones

TECHNICAL SKILLS

Analytics Tools:	MS-Excel, Power BI (M query, DAX, Semantic Modelling, RLS), MS-Fabric, Power Apps
ETL & Programming:	Python, PySpark, SQL, Alteryx, ETL Pipeline Design, Azure, Power Automate, MySQL
Project Management:	SharePoint, Process Improvement, Stakeholder Management, Scope and Schedule Control
Certification:	Microsoft PL300: Data Analyst , Alteryx, Databricks , AWS

PROJECTS

Population Health Analysis | Power BI, Excel, Python, Claude, SQL| [Link](#)

- Developed Population Health analytics dashboard synthesizing 55,500 patient admissions across 9 hospitals, providing leadership with visibility into LOS drivers, cost concentration, admission trends to support data-driven planning

Logistics Analytics| Python, Power BI, Data Modelling, Power Query| [Link](#)

- Performed end-to-end Supply Chain and Logistics Performance Analysis using shipment data to evaluate on-time delivery, route efficiency, lead time, and operational KPIs, identifying bottlenecks across the supply chain network

EDUCATION

Northeastern University, Massachusetts

Sep 2023 -Dec 2025

Master of Science, Data Analytics Engineering, GPA: 4.0/4.0
