

SIDDHANT SINGH

Data Analyst | Business Intelligence & AI Analytics | Performance & KPI Analytics | Data-Driven Insights for Decision Making
(617) 413 5248 | siddhantsid2199@gmail.com | [linkedin.com/in/siddhantsingh21](https://www.linkedin.com/in/siddhantsingh21) | [GitHub](#) | [Why Hire me?](#)

PROFESSIONAL SUMMARY

Data Analyst with **4 years of experience** turning multi-source data into automated reporting and executive insight. Expertise in SQL, Python, Power BI, and Alteryx, delivering ETL pipelines, semantic models, and KPI dashboards that cut reporting cycle time and manual effort. Identifies opportunities to embed AI tools into analytics workflows to accelerate delivery and scale self-service reporting.

EDUCATION

Northeastern University, MA – Master of Science, Data Analytics Engineering, GPA: 4.0/4.0 **Sep 2023 - Dec 2025**

PROFESSIONAL EXPERIENCE

Data Analyst, Viatris Inc, USA **Mar 2026 - Present**

- Developed a simulation model to forecast project timelines and volumes as part of a \$1B+ tech-transfer project to minimize regulatory and inventory costs, enabling leadership decisions on risk tradeoffs
- Transformed a legacy Excel model into an automated Alteryx workflow integrated with Python simulation and Power BI, cutting manual update time from 6+ hours to under 10 minutes
- Improved report performance by 30% for 4 weekly performance metrics by integrating data from SAP S/4HANA, Rapid Response, and Datacube (OLAP) into unified analytics pipelines using Alteryx, Python, SQL, and Power BI
- Designed 9+ Power BI dashboards using Microsoft Fabric semantic models (DAX, Power Query/M), supporting budget tracking across 4 strategic projects and earning placement among Viatris' top 3% highest-utilized dashboards
- Building a PySpark-based data warehouse on Microsoft Fabric with Azure Data Factory orchestration and Delta Lake medallion architecture, processing 10M+ records for enterprise Power BI semantic models

Data Analyst Intern, Viatris Inc, USA **Jul 2024 - Dec 2024**

- Translated complex business requirements from Senior Directors and VPs into technical specifications, delivering automated analytics adopted across 4 global teams and accelerating executive decision-making
- Enhanced reporting capabilities, designed and optimized 100+ SQL queries and PL/SQL packages, and created Power BI dashboards for Senior Directors and Lead Specialists
- Built ETL pipelines and optimized 50+ Alteryx workflows automating forecast-versus-actual variance analysis, reducing reporting cycle time by 28% and improving planning accuracy across business units
- Delivered a Power Apps solution integrating SharePoint, Dataverse, Power Automate, and Microsoft Copilot Studio, streamlining operational data collection for 5 Lead Specialists and eliminating duplicate submissions
- Streamlined reporting with Power Automate workflows on SharePoint lists, automating version-controlled reporting, notifications, and summaries while saving 12+ analyst hours weekly
- Owned 4 Excel simulation tools leveraging Power Query, Power Pivot, DAX measures, what-if scenario modeling, dynamic array formulas, and nested SUMIFS/VLOOKUP logic, adopted by 40 planners across 10 sites

Teaching and Research Assistant, Northeastern University, USA **Sep 2025 - Dec 2025**

- Guided 90+ students on Power BI dashboards, narrative visualization design, leveraging GenAI tools (Copilot in Power BI, LLM-drafted DAX, MCP) to deliver rubric-aligned feedback grounded in data-storytelling principles and BI design

Data Analyst, Habtec Tubes Industry, India **Oct 2020 - Jul 2023**

- Initiated end-to-end development of 8+ Tableau dashboards tracking yield, WIP, and logistics KPIs and material usage trends, identifying operational bottlenecks and delivering actionable insights that improved logistics efficiency by 20%
- Supported Integrated Business Planning (IBP) and sourcing initiatives by analyzing sales forecasts, production capacity, and supplier performance data, applying Lean Six Sigma methodologies to improve planning accuracy
- Pioneered a logistics optimization approach with SQL for procurement and production teams, processing 15M+ records to group similar orders and prioritize delivery dates, cutting analysis time by 25%
- Led a high-performing analytics team of 5 through Agile sprint cycles, coordinating deliverables, resolving blockers, and ensuring on-time delivery of enterprise BI assets across global time zones

TECHNICAL SKILLS

Programming Languages: Python, PySpark, SQL, DAX, Power Query (M), Microsoft Excel (SUMIFS/VLOOKUP, Pivot)
Business Intelligence: Power BI (Semantic Modeling, RLS), Tableau, Reporting, Data Storytelling, Power Apps
Data Engineering: Alteryx, ETL, Azure Data Factory, Microsoft Fabric, Delta Lake, Data Modeling, Data Integration
Enterprise Systems: SAP S/4HANA, Datacube (OLAP), Kinaxis Rapid Response, SharePoint, Dataverse, Databricks
AI Tools: Microsoft Copilot, LLMs, Model Context Protocol (MCP), AI-Assisted Analytics (Claude)
Business Skills: KPI Reporting, Stakeholder Management, Process Improvement, Agile, Lean Six Sigma
Certifications: [Microsoft PL-300 Power BI Data Analyst](#), Alteryx, [Databricks](#), [AWS](#)
